1. AT A GLANCE

- A summary of key event details, including the team size (1 or 2 participants), format (Inter-College | Progressive Elimination), 2 rounds, a duration of 90 minutes per round, open tech stack, AI usage allowed, and a registration fee of ₹99 per participant/team.

2. INTRODUCTION

- ForgeX is a multi-round programming and development competition focused on building fully functional applications within a strict time limit. The competition emphasizes practical implementation, rapid execution, and problem-solving, following a progressive elimination format across two rounds of increasing complexity.

3. TRACKS & ROUNDS

- The competition consists of two sequential, 90-minute rounds. Round 1 is an "Open Build" where participants use their own idea or a provided problem statement. Round 2 is the "Theme-Based (Final)" round, where a single common theme is revealed at the start, focusing on adaptability and depth of implementation.

4. PROBLEM STATEMENT

- The 90-minute timer starts immediately upon announcement. Participants must interpret the requirement, design a solution, and deliver a working project within the allotted time, with no extensions granted.

5.**RULES & REGULATIONS**

- Covers the mandatory conditions for participation, including the Submission Format (complete project folder, source files, and a README), Tools & Languages (open choice), the AI Usage Policy (AI is permitted for code generation and debugging, but submissions must be fully functional and understood by participants), Collaboration Rules (solo or duo teams only, no external collaboration), and Time Rules (strictly 90 minutes per round).

6.J**UDGING CRITERIA**

- Submissions are evaluated out of a total of 100 marks. The criteria are: Functionality (40 marks), Code Quality (20 marks), Creativity & Innovation (25 marks), and Time Management (15 marks).

7.**SCORING SYSTEM**

- Details the 100 total marks available per round and specifies that the top performers advance after Round 1 and final rankings are determined in Round 2. Tie-breakers are determined first by the higher Functionality score, and second by the higher Creativity score.

8. **DELIVERABLES**

- Participants must submit the complete project folder and a README file at the end of each round. Submissions must be runnable or properly documented for execution.

9.P**ENALTIES & DISQUALIFICATIONS**

- Lists severe violations, such as late submission, plagiarism, or external collaboration, which result in immediate DISQUALIFICATION. Minor violations like a missing README or poor documentation result in MINOR PENALTIES and score deductions.

10.**GENERAL NOTES**

- Provides general rules: Eligibility (open to all students from recognized institutions), Participation (team size fixed after registration), and Environment & Resources (participants must have a working system and pre-installed tools)

11. **Prizes:**

- **First Prize: 5,000/-**
- **Second Prize: 3,000/-**
- **Third Prize: 1,000/-**

12. **Co-ordinators**

Student Coordinator	Chetan Badgujar	8530052396
Faculty Coordinator	Prof. Savita Ghatte	9561502355
