1. Introduction

- Bridge Nova is a technical event organized by the Department of Civil Engineering, Zeal College of Engineering and Research, Pune. This event aims to encourage innovation, structural understanding, and practical engineering skills among students through a bridge construction challenge..

2. Event Overview

- Participants are required to design and construct a bridge model using only provided materials. The bridge will be tested for strength, efficiency, and structural performance under load conditions.

3. Eligibility Criteria

- Open to all registered students.
- Participation is allowed only in teams.
- Teams must complete registration prior to the event.

4. Registration Process

- Teams must register through the official event platform or designated coordinators.
- Only registered teams will be allowed to participate in the competition.

5. Entry Fees:

- 150/- per team

6. Team Composition Rules

- Each team can have a maximum of 4 participants.
- No changes in team members will be allowed after registration.

7. Event Format & Structure

- Construction Date: 23rd April 2026
- Testing Date: 24th April 2026
- Construction will take place within the Civil Engineering Department under supervision.
- Testing will be conducted separately under controlled conditions.

8. Problem Statements & Themes

- Participants must design and construct a free-standing bridge using limited materials that:
- Meets specified dimensions
- Maximizes load-bearing capacity
- Achieves optimal efficiency ratio

9. Development Guidelines

Materials Provided:

- Ice cream sticks
- Adhesive (Fevicol/Glue)

Restrictions:

- No additional materials allowed (e.g., thread, wire, tape, clips, pins, etc.)

Bridge Specifications:

- Minimum Length: 60 cm
- Minimum Width: 10 cm
- Minimum Height: 10 cm
- Bridge must be free-standing
- Only provided sticks must be used (cutting/trimming allowed)

Construction Rules:

- Bridges must be built during the event timeframe.
- Structure should be neat, stable, and well-designed.
- Each stick must remain visible for verification (avoid excessive overlapping).

10. Submission Guidelines

- Completed bridges must be submitted before testing.
- Bridges will be inspected for compliance with rules before evaluation.
- Non-compliant structures will not be tested.

11. Evaluation Criteria

1. Self-Weight Measurement:
   - Each bridge will be weighed before testing.
2. Load Testing:
   - Bridge will be placed on supports 40 cm apart.
   - Load (sand) will be applied gradually at the center.
   - Maximum load before failure will be recorded.
3. Performance Ratio:
   - Efficiency Ratio = Load Carried / Self Weight
   - Highest ratio determines the winner.
4. Tie-Breaker:
   - Bridge carrying higher absolute load will be preferred.

12. Code of Conduct

- Participants must maintain discipline throughout the event.
- Follow all instructions given by coordinators and judges.
- Any misconduct or disruption will lead to penalties or disqualification.

13. Disqualification Rules

- Participants will be disqualified if:
- Unauthorized materials are used.
- Bridge does not meet dimension constraints.
- Any unfair practices or rule violations are observed.

14. Reporting & Result Declaration

- Results will be declared after completion of testing and evaluation.
- Judges’ decision will be final and binding

15. Prizes & Rewards

The following prizes will be awarded to the top-performing teams based on the evaluation criteria:

Prize Distribution

- First Prize: ₹6,000
- Second Prize: ₹3,000
- Third Prize: ₹2,000
